

BMLC2GUI Installation Instructions (Windows)

Last updated: 02/16/2011

Java Note: Make sure java is installed and the classpath environment variables are setup.

Steps to setup and run the BMLC2GUI

1. Create a folder on your C: drive named BMLC2GUI
2. Checkout all folders and files from the OpenBML BMLC2GUI SVN to the C:\BMLC2GUI folder or just download the BMLC2GUI.zip file and extract it into the local folder.
3. Copy the batch file "bmlc2gui.bat" anywhere convenient to you and run it by double clicking or by changing the directory to c:\BMLC2GUI and typing "bmlc2gui" at the command prompt.

The GUI main window will appear and you can start now.

Configuring BMLC2GUI SBMLClient

If you need to run the GUI with the SBMLServer and subscription services, some modifications might be required. The following is a screen shot of the configuration menu. Changes might be made to suite user's environment. Details are in the User's Guide.
